Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 22, 25, 48 and 51 are objected to because step "c" should be --step "d"--.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-25 and 46-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hurlburt (U.S. Patent 891,174) in view of Blakeman (U.S. Patent 2,363,567).

Hurlburt discloses a method of providing a lid (5) with a plurality of interlocking structures (6, 9) having projecting portions that extend above and below (Figure 3) a shoulder (4) of a shroud (1). The first interlocking structure (6) is interlocked with the shoulder. A key (not shown, inserted at 15) is used to interlock a second interlocking structure (9) which is positioned at the periphery of the lid. This second interlocking structure (9) meets the recitation of a lock having a locking member (see Figure 3, for example). Hurlburt does not teach the nesting annular shrouds. Blakeman teaches using an exiting annular shroud nesting a second annular shroud (Figure 2, for example) in order to fit the cover to fit the cover to larger existing openings. For this reason, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used nested annular shrouds with Hurlburt.

Response to Arguments

Applicant's arguments with respect to claims 20 and 46 have been considered but are moot in view of the new ground(s) of rejection. The deficiencies of Hurlburt are overcome by Blakeman, as discussed in the rejection above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 571-272-6989. The examiner can normally be reached on Monday through Thursday, 9am-7pm.
